

ATEX UNDER REQUEST

AIRMATIC

The AIRMATIC sieving machine, is equipped with a vibrating motor with pneumatic drive, has the particularity of working without electric current.

- > Prepared to work with liquid or solid products.
- > It has standardized laboratory sieves, allows a quick change or replacement and effective cleaning.
- > Thanks to its small diameter, it allows to introduce sieves in ultrasonic baths or similar cleaning systems.

> Entry of the product by the top of the equipment, has a methacrylate ring that holds the sieve.

> The filtered product is discharged through a central discharge hopper.

It is supplied on a INOX bench with wheels to facilitate its mobility and sieve in different areas.

TECHNICAL FEATURES

- > Operation by pneumatic system (without electric current).
- > Specialized in safety screening.
- > Sieve for small productions.
- > Quick change of sieves.
- > Easy cleaning of sieves and equipment bottom.
- > Possibility to mount quick closures for lid.
- > Easy handling.
- > Low maintenance.
